Applicant elected the species: dithiocarbamates in Paper No. 6. The restriction and election of species requirements of Paper No. 5 is repeated and made Final. Applicant has cancelled the claims drawn to Group II

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over CANADIAN PATENT 1,174, 810.

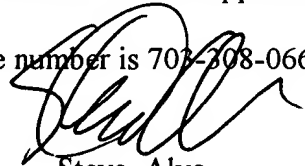

The CANADIAN PATENT teaches a method of making chemical pulp by digesting wood chips to produce a pulp by treating the pulp with 0.001 to 2.5% dithiocarbamates during pulping (prior to the bleaching) and then bleaching the pulp, see Examples 42-53, page 20, last line. If necessary it would have been obvious that the dithiocarbamates of CANADIAN PATENT would act as a chelant as it is treating the same material in the same amounts as Applicant and thus would obviously function in the same way, e.g. as a chelating agent.
